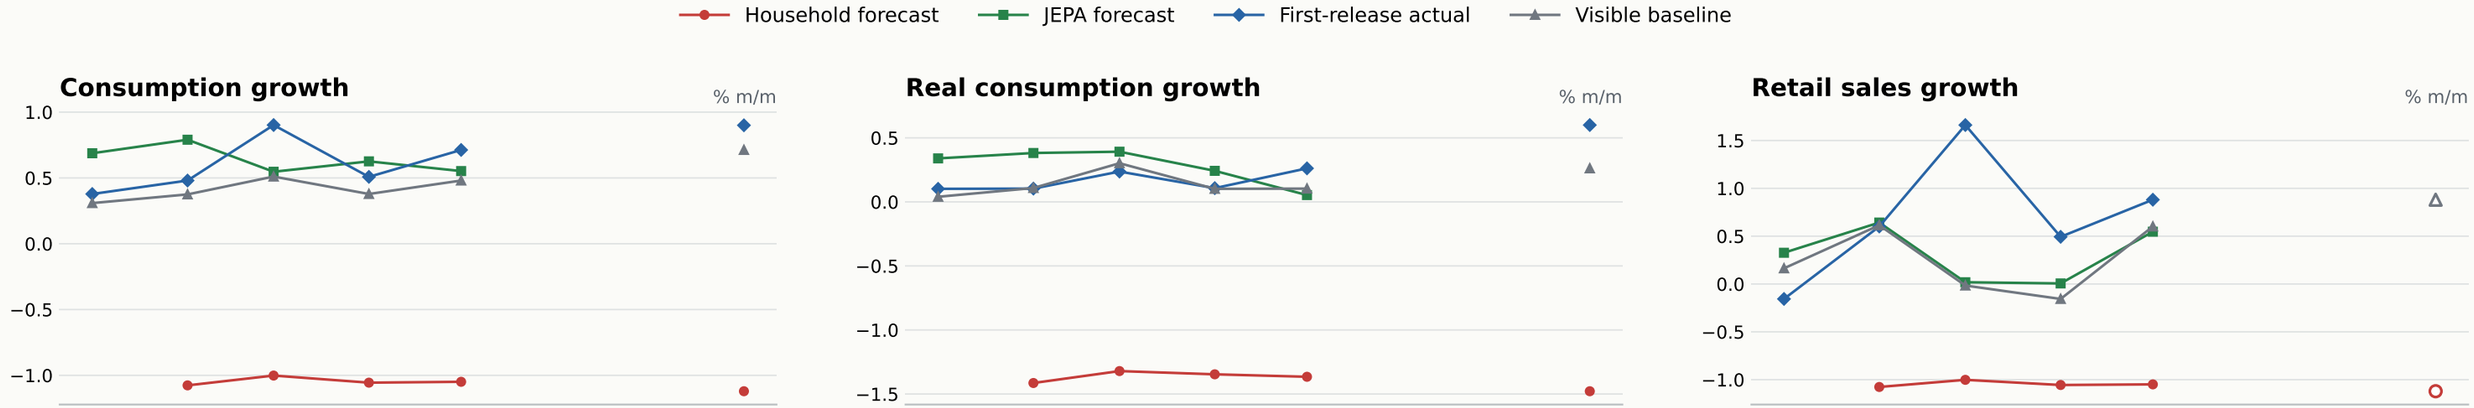
2026 macro forecasts and first-release outcomes



Monthly values; quarter labels are navigation only. Jan 2024–Dec 2025 origins: held-out blocked backtest.
2026 retrospective values are development evidence; August forecasts are frozen and paired with first releases.
Hollow August markers are unscored; no JEPA August forecast exists. No uncertainty bands were saved.
Household outputs retain their declared proxy mappings; nominal spending is primary. Credit shows direction only.
